January 6, 2023

To: Neighbors of the 3751 Danbury Road, Brewster, NY Project

Dear Property Owner:

As you may be aware, construction has begun at 3751 Danbury Road in Brewster, New York. In order to facilitate bedrock removal there is a need to perform several controlled blasts. As a courtesy to the homeowners and occupant neighbors of the project, Hayduk Enterprises is informing you blasting is about to begin. **The blasting is projected to begin on or about January 11, 2023 and continue intermittently for several weeks.**

The controlled blasting will take place Monday through Friday between 8:00 AM and 5:00 PM, weather permitting, with the accompaniment of a series of horns prior to the blasting activity. The blaster-in-charge will signal 2 long horn signals 1 minute prior to blast. Following the blast, the blaster-in-charge will signal 1 short to indicate the blast is all clear. The work will be supervised and conducted by personnel who are well qualified and who have extensive experience in this field. The controlled blasting operations will also be monitored with portable seismographs to ensure the vibrations generated by the blasting are within safe limits. It is *likely* and *normal* that you may be able to feel the vibrations and hear the sound from the blasting activity. Rest assured the blasting, albeit noticeable, will be designed to limit vibrations and air-overpressure to under legal limits to present no threat of damage to surrounding structures.

Thank you for your cooperation,

Don Haney
